- Swivel discharge chute
- Forward / reverse bar
- Foldable feed tray
- Replaceable wear strips
- Sealed bearings
- Trailerized/ 3-point mounted

200 mm Drum-Style Hydraulic-Feed Chippers

A very popular unit for clearing alien vegetation and chipping seasonal waste after pruning fruit trees. The Model 200 PTO wood chipper offers you durability, high productivity, efficiency and simplicity. The most popular features on this chipper are the extremely powerful feed rollers driven by the Parker hydraulic motors, the hydraulic lift cylinder, a forward/reverse bar for safety, an independent hydraulic system and reversing auto-feed, making this unit the best all round machine in our range to have on your farm. Whether the job is clearing alien vegetation to use as mulch or just processing orchard prunings, this machine is the answer. The foldable feed tray comes standard and assists the operator to place large amounts of small material into the machine and also creates a safer working distance. This unit is built tough enough to chip branches of up to 200mm in diameter while still being light enough to be hooked behind an average sized tractor.
